

## Lab safety courseware

According to Chinese safety regulation and Campus lab safety requirement, it is mandatory for all individuals working in a chemical / biological laboratory to complete a safety training prior to commencing work and a refresher training once a year.

The safety unit had uploaded the lab safety courseware onto Campus EHS website. These materials have been prepared by the Technion Safety Department and as such they also comply with Technion Safety Standards.

You can access the courses by the following links:

- [Chemical safety courseware](#)
- [Biological safety courseware](#)

At the end of each courseware there is an exam that must be passed successfully.

Please make sure that all the relevant principle investigators, researchers, employees, graduate students and students will complete the courseware and the following exam.

Please notice that **it is forbidden to work in a lab without a safety training**

For any additional information, you are welcome to contact the safety unit or to visit our [web site](#).

Best regards,

**GTIIT Campus EHS Office**
